Tearing strength - 4 (1-4)

Puncture resistance- 4 (1-4)

Cut resistance (TDM)- X (A-F)

X means NOT TESTED

Use and care

Carefully inspect the gloves before you put them on. Look for cracks, tears, holes, swelling or other damage. If you spot any damage, discard the gloves. Clean the outside of your gloves after every use. Dirty gloves should be cleaned with a cloth or a soft brush. It is forbidden to use flammable detergents and chemical detergents. Wet gloves should get dry at room temperature. Put your gloves in the proper container when you are finished with your task for the day.

Packaging and storage

The gloves are packed into plastic bags. Each bag contains 12 pairs and then cartons. The gloves should be stored in a dry and cool place and should not be exposed to direct sunlight. If you follow the recommendations of storage, the gloves are useful for 3 years from the date of purchase.

Comments

There were not found substances in the materials used for the production of the gloves affecting the health and life of the user. However, if you notice any allergic reaction, please consult a doctor. The gloves should not be worn when there is a risk of being caught by moving machine parts. The protection is limited to part of the hand. The Gloves provide protection only against the hazards mentioned in this instruction for use. It is recommended to check the gloves visually before each use.

Damaged gloves (abrasions, tears, or rips) should be immediately withdrawn from use.

Disposal

Dispose in accordance with the regulations being in force in your country.
